

## Bay Dynamics' Risk Fabric Integration with HP ArcSight

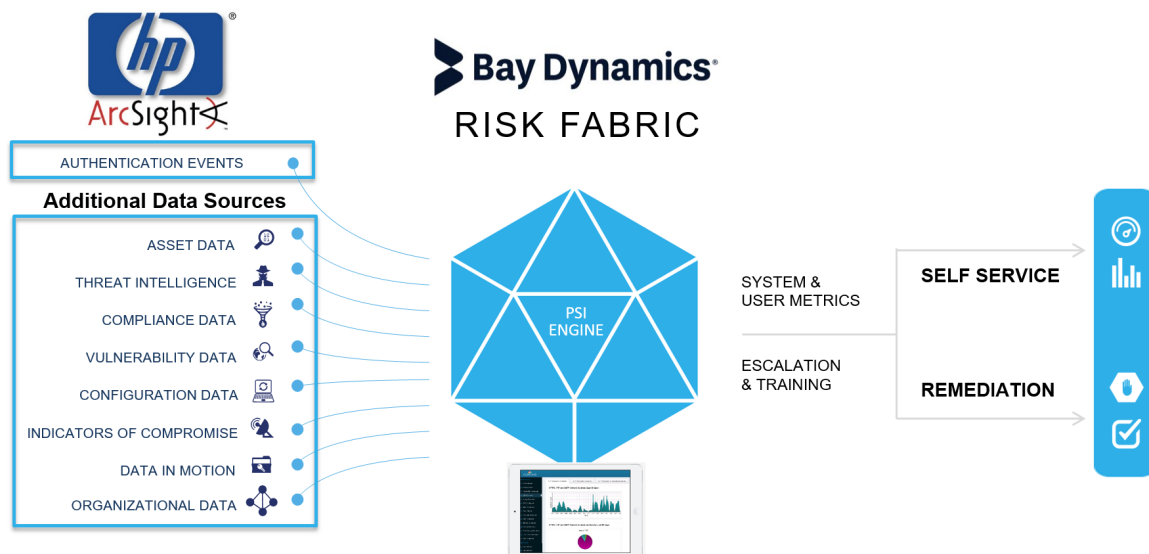

### Key benefits of the integration

- Actionable cyber risk insights through correlation of relevant data
- Contextual awareness into insider, vendors and bad actors within the organization
- Effective cyber risk management across organization's complete ecosystem

### Solution Overview

Bay Dynamics' Risk Fabric integration with HP ArcSight allows Risk Fabric's innovative approach of user behavior and predictive analytics to assemble and correlate relevant data from HP ArcSight and provide actionable cyber risk insights, before it's too late.

HP ArcSight and Bay Dynamics Risk Fabric integration enables organizations to effectively manage risk and maintain a healthy cybersecurity posture. Bay Dynamics Risk Fabric Platform with its user behavior and predictive analytics approach, assembles and correlates relevant data collected and enriched by ArcSight along with other existing tools to provide actionable insights into cybersecurity blind spots. The integration is enabled by an out of the box bi-directional connector that facilitates automation and centralized management.

Bay Dynamics Risk Fabric Integration with HP ArcSight

# Risk Fabric®

A PREDICTIVE SECURITY ANALYTICS PLATFORM

## Bay Dynamics Risk Fabric Platform

Bay Dynamics' Risk Fabric is a purpose-built cyber risk predictive analytics platform that assembles and correlates relevant data in a novel patented way to provide actionable visibility into cybersecurity blind spots, before it is too late.

## Bay Dynamics Solutions

Risk Fabric provides actionable intelligence to Bay Dynamics' Risk Fabric Platform powers following solutions:

**Insider Threat** - Identify and provide prioritized list of insider threats, anomalous behavior reports and automated incident management

**Outsider Threat** - Identification and prioritized listing of outsider threats with malicious activity, rich correlation across perimeter activity and automated remediation

**High Privilege Access** - Proactive identification of high-risk users, detection of unusual user behavior, correlation and contextualization of critical assets with observed and unusual user behavior

**Attack Surface Threat** - Proactive identification of exploitable critical assets, correlation across compliance information, threat indicators and vulnerabilities in applications and systems

## About Bay Dynamics®

Bay Dynamics® is the market leader in cyber risk predictive analytics providing actionable visibility into organizations' cybersecurity blind spots, complete with business risks and threats. The company's purpose-built Risk Fabric® platform assembles and correlates relevant data from existing tools in a novel patented way to provide actionable cyber risk insights, before it's too late. Bay Dynamics enables some of the world's largest organizations to understand the state of their cybersecurity posture, including contextual awareness of what their insiders, vendors and bad actors are doing, which is key to effective cyber risk management.

## About HP Enterprise Security

HP is a leading provider of security and compliance solutions for the modern enterprise that wants to mitigate risk in their hybrid environment and defend against advanced threats. Based on market-leading products from HP ArcSight, HP Fortify, HP Atalla, and HP TippingPoint, the HP Security Intelligence Platform uniquely delivers the advanced correlation, application protection, and network defenses to protect today's hybrid IT infrastructure from sophisticated cyber threats.
